

Few Terms:

1. Microsoft Copilot Extensions

Browser or development add-ons that enhance Copilot experiences—for example, the **Microsoft 365 Copilot extension**, which personalizes search and integrates third-party app data directly into Copilot.

🔗 Official site: <https://learn.microsoft.com/en-us/microsoftsearch/crossover-browser> ¹

2. Copilot Extensions (General)

Extensions or add-ins that expand Copilot capabilities, such as the **Copilot Studio extension for Visual Studio Code**, enabling developers to build and manage Copilot agents.

🔗 Official site: <https://learn.microsoft.com/en-us/microsoft-copilot-studio/visual-studio-code-extension-install-configure> ²

3. Microsoft Entra ID

Microsoft's cloud-based identity and access management (IAM) solution (formerly Azure AD), providing secure authentication, conditional access, identity protection, and centralized user management.

🔗 Official site: <https://www.microsoft.com/en-us/security/business/identity-access/microsoft-entra-id> ³

4. Microsoft Graph

The unified API endpoint for accessing Microsoft 365 data and intelligence—used to build apps that integrate with Microsoft services like Teams, Outlook, OneDrive, and more.
